

# Activate Azure with Hybrid Cloud

EXTEND YOUR INFRASTRUCTURE  
TO THE CLOUD

The Activate Azure with Hybrid Cloud offer, helps introduce you to the basics of common Microsoft Azure workloads, provides guidance and education for your IT engineers, and support during initial workload deployment. This four-day engagement begins with an

Education session to help enhance your team's technical and operational skills and help drive operational readiness, followed by an Onboarding session developed with a Microsoft engineer, who works with you to create a working Proof of Concept (PoC) on your environment.

## ♦ OUTCOMES ♦

**01**  
**EDUCATION**

Help enhance your support staff's technical and operational skills and help drive operational readiness.

+

**02**  
**HANDS-ON PoC**

Helps you to understand how to leverage the power and flexibility of the Azure infrastructure.

=

**03**  
**ACTIVATION**

The full understanding and deployment of a real Hybrid Infrastructure as a Services base environment

## ♦ CAPABILITIES ♦

The Activate Azure with Hybrid Cloud will help to transform industry challenges into your opportunity by distinguishing yourself, and delighting your customers with Microsoft Azure and IaaS based application platforms.

### Leverage Infrastructure

Learn to identify, plan, and build a functioning environment in the cloud leveraging Hybrid Cloud capabilities of Azure.

### Productive for Admins and Developers

Understand the power of automatic scripting for deploying test and development environments on Azure.

### Consistent Hybrid Cloud

Build and deploy wherever you want with Azure, the only consistent hybrid cloud on the market.

## SCOPE

Duration: 4 days

| 1 <sup>st</sup> Day                              | 2 <sup>nd</sup> Day   | 3 <sup>rd</sup> Day | 4 <sup>th</sup> Day                                    |
|--|---|---------------------|--|
| Education  | Proof of Concept Main Track   |                     | Proof of Concept Elective Tracks                       |
| Learn the foundations of the Azure Hybrid Cloud. | Deploy an Azure Hybrid Cloud environment with Networks, Storage, Virtual Machines, Firewalls, VPN, Automation, Monitoring, etc. |                     | Choose one elective track: Recovery Services or Linux. |

## CUSTOMER EVIDENCE

*The presenter was able to talk to the basics for my team that was being introduced to Microsoft Azure, while also talking very technical with the experienced team members.*

Customer: Reyes Holdings

## ADDITIONAL DETAILS

The IT Manager, Architect and Program Manager for your Cloud project can define the audiences that will interact with the Microsoft Engineer as part of the engagement. Recommended participants are the teams that will lead cloud adoption within your organization:

Recommended participants include:

- IT Managers
- Network Team
- Security Team
- Servers Team
- SQL Team
- Application Team
- Architects
