RAP as a Service for Active Directory

Online
Duration: 12 month subscription | 1 Day engineer review

RAP as a Service for Active Directory is a proactive service delivered by a Microsoft accredited engineer to diagnose potential issues with your Active Directory environment running on-premises, on Azure VMs, or on Amazon Web Services (AWS) VMs. This service is available for a single Active Directory forest including domain controllers running Windows Server® 2008/R2, Windows Server® 2012/R2, Windows Server® 2016 or Windows Server® 2019.

OUTCOMES

The RAP as a Service for Active Directory provides you with a recommendation report and plan of action to improve your Active Directory environment based on best practices and expert knowledge.

01 CONTROL

You control where your data is stored and easily share results with your IT staff and others in your organization.

02 EXPERT RESULTS

Solutions for each of the issues are identified and articulated in recommendations on the Azure Log Analytics portal.

03 ACTION PLAN

Our Microsoft accredited engineers review the RAP findings, provide recommendations and build a remediation plan with you.

CAPABILITIES

Gain valuable insight into the health of your Active Directory deployment by proactively diagnosing issues and risks, reviewing your results, and receiving guidance to improve the health, performance and stability of your Active Directory deployment.

HOLISTIC RECOMMENDATIONS

Our recommendations are based on expert evaluation of people, process and technology.

CONTINUOUS IMPROVEMENT

Use your 1-year subscription to watch your results improve as you act on recommendations and fix issues in your environment.

ALWAYS CURRENT

Thousands of Microsoft technology experts continually provide updates to our analysis and guidance.
